Work Experience

Interactive Media Developer

INVIVO Communications Inc.

2017 - Present
Toronto, Ontario

Development of augmented reality and virtual reality games and applications for global healthcare and pharmaceutical organizations.

Graduate Research Assistant

KAIST

2015 - 2017
Daejeon, South Korea

Designed and developed an augmented reality game editor for the HoloLens and a collaborative augmented reality interior design application for Project Tango devices. Conducted formal and informal evaluations to determine the usability and user experience of both systems.

Tools and Systems Programmer

Digital Leisure Inc.

2014
Aurora, Ontario

Constructed a pipeline to streamline the development of 3D art assets for the Four Kings Casino and Slots, which is available on Steam and the PlayStation Store. Collaborated with the art and design teams to create the necessary in-game tools, plugins for Maya and Unity, and web reports for the pipeline.

Undergraduate Research Assistant

University of Ontario Institute of Technology

2012 - 2014
Oshawa, Ontario

Collaborated with surgeons at the SickKids Research Institute on the design of multiple medical simulations used to research the effectiveness of games as an education and research platform.

Software Developer (Intern)

BeaconWall Ltd.

Summer 2012
Hong Kong

Took over the existing code base for MaXiT Systems and led the development of a network and mobile module for the MFC desktop client. Demonstrated the product to the client to obtain usability feedback.
